

HSL-34 DET 2

HSL 34, detachment 2 has been deploying with **TICO** since March '91. Flying the SH-2F Seasprite helicopter, the det spent the majority of the deployment functioning in the role of Surface Search & Surveillance, Gunfire Support and logistics support. The Det is composed of 5 pilots, and 2 aircrewmembers, as well as the 11 maintenance professionals who make up the ground crew. Providing air support to the **TICO** has been both a demanding task and a challenge to the detachment.

Hard work is always tempered by hard play, and the boys in the detachment partied as hard as they flew. We made the best of the liberty ports we saw, but home is always the best port visit a sailor (or airdale) can hope for. So, with the security of our nation intact, the detachment returns once again to ensure the security of the loved ones they had to leave for 6 long months.
