

DENTAL

CDR C.E. Wingard

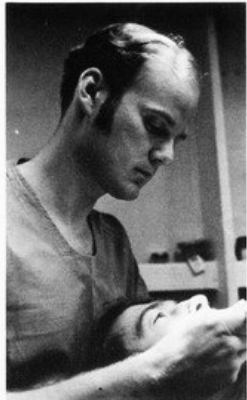

DENTAL

The Dental Department has been very active in the preventive dentistry program during cruises and has called in many patients for the preventive dentistry treatment.

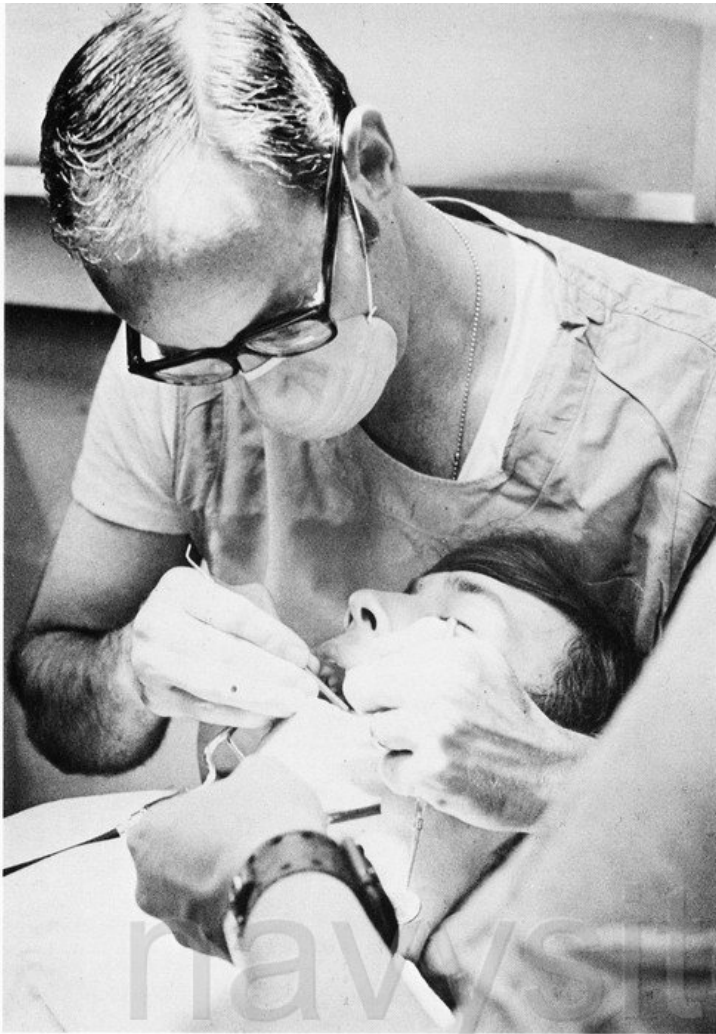

The department is made up of three dental officers and six dental technicians with three dental operatories and a prosthetic laboratory. With the men and equipment they have they can provide all types of dental treatment such as operative (fillings), endodontia (root canal fillings), periodontia (gum treatments), prosthodontics (crowns, bridges and dentures) and exodontia (extractions).
